Brief description of purpose and content: There has been a lot of research on the Reggio Approach since it was first introduced in the USA back in the early 90s. What is it all about? Is it a "thing" I can buy? Is there a handbook I can use? Why is it so popular? Can we do "it" here in San Diego? Come and learn about the "philosophy" of the approach and

how YOU can easily incorporate the philosophy into your own classroom. All you need is an open mind - a creative willingness to let the children 'spark' some of the learning which is of interest to them, and turn of the limits on "time set by a clock or calendar" and engage in wonderful projects that the children will teach you and each other.
